

Boat accessories affecting the fit of your cover

 **This list may not have every possible accessory included.** If you are still unsure whether your boat has an accessory that might affect the fit of a boat cover after reading, please contact our boat cover specialists so they may assist you.

Unless mentioned in the product description, product notes, product title, by Carver Industries' website/customer service, or a Boatersoutlet.com Boat Cover Specialist, please do not assume that your accessory is accommodated for in the fit of a boat cover. Some boats may even ship from the manufacturer with an accessory that is considered "non-standard", meaning they are not accommodated for in the fit of custom and styled-to-fit covers. **It is the responsibility of the buyer to inform Boatersoutlet.com if there are any accessories on the boat that may cause boat cover fit issues prior to purchase.**
